Math Power #9

> A multiple of three I be,
> Not Odd, but even you see.
> Two digits have I
> With a difference of five
> And a sum that's a
> Perfect square factor of me.

What number is described above? _____

Write your own poem that describes a unique two digit whole number less than 100 to the exclusion of all others and provide the answer.

This is not ok…

> Roses are red.
> Violets are blue.
> I hate this assignment.
> My number is two.

Although funny, it has to have more math than that, and two is not a 2-digit number.
